Bots are the future of trading. The world's leading investors have been trading with bots for a long time. Now you can too!

Skip months of learning or copy the strategies created by other traders without emotional impulse.

FAQ

What is AntBot AI?

AntBot AI is a premium quality crypto trading bots driven by AI, Quant & Mathematical models.

Why should i use AntBot AI?

More than 90% of crypto traders or investors lose their money because markets trade 24/7, with high volatility which make it difficult to make a decision to buy or sell. Many significant data, signals and sentiment analysis are hard to interpret by humans.

Should we have to build our own bots or copy trading?

No. We don't recommend you to build your own bots or copy other traders setting. We already developed the bots using the latest advances in AI Technology, Sentiment Analysis, Mathematical Models & Quantitative Finance.

How much can we earn in a day?

Using AntBot AI is not an assured "pay-cheque". It will simplify your life by automating trades and over a time will perform better than humans and will achieve great returns.

Can we become rich by using AntBot AI?

Only the schemer promise investors a return on investment for each day or each month that their money is invested in the firm. We can promise you a steady return over a period of time but as always in crypto or any other assets come with risks.

Is AntBot AI non-custodial?

Yes, your funds is safe and remain in your own account on your exchange.

Does BOTS charge fees?

Yes, the transaction fees are charged by platform by using "Energy". 100 Energy = 1 USDT.
0.2 Energy x "Value Investment" per transaction for spot and 0.1 Energy x "Value Investment" per transaction for futures.
